Bachelor of Science in Communication Science	3	A
Bachelor of Science in Psychology (Joint Section)	3	A

Teaching languages

Dutch

Keywords

philosophy, concept of the human being, history, free will

Position of the course

The course Philosophy is a supportive course in the Bachelor Psychology. It offers students an introduction to (the history of) Western philosophy. Central themes include the search for reliable knowledge (truth) and self-knowledge (wisdom), the philosophy of free will, as well as philosophical reflection on the origins of human behavior.

The course is part of the module Models in Psychology, which focuses on understanding, explaining, and predicting human behavior.

Contents

In this course unit, we examine how different philosophical traditions reflect on the characteristics of human beings. Key questions include: What kind of being is the human? How do humans differ from (other) animals? How do nature and nurture interact in shaping human behavior? Do we have free will? In light of modernity and scientific developments such as behavioral genetics, neuroscience, and evolutionary theory, how can humans find meaning? On what basis can we lead an authentic and meaningful life? Is such a life even possible, considering the views of several thinkers who argue that human behavior is determined and that humans are perpetually prone to self-deception?

We critically examine a range of perspectives on these and related questions, drawing on authors such as Aristoteles, Kant, Freud, Nietzsche and Nageland working within diverse frameworks including free will skepticism, biopsychosocial sciences, philosophy of mind, philosophical psychology, etc.. Throughout, we assess the insights developed by these and other thinkers concerning the origins of human behavior and how one might flourish in life.

Initial competences

No specific prerequisites.

Final competences

- 1 To understand the specific nature of philosophical problems and types of analysis, with a particular focus on philosophical anthropology.
- 2 To be able to understand current philosophical thinking, based on a solid academically sound historical background.
- 3 To be able to critically define the most significant terms of philosophy.
- 4 To recognise the principal schools of thought and their proponents on an academic level.
- 5 Having an insight in and be able to critically think through the relations between philosophy, science and society.
- 6 General knowledge of the philosophical debate on free will and moral responsibility.
