Teaching languages

Dutch

Keywords

philosophy, history

Position of the course

The course Philosophy is a supportive course in the Bachelor Psychology. It presents an introduction to the history of Western philosophy and focusses on the search for reliable knowledge (truth) and self-knowledge (wisdom), and the philosophical reflection on the emergence and development of the scientific method.

It is a part of the module on Models in Psychology, in which the understanding, explanation and prediction of the human are central.

Contents

The course offers an introduction to (the history of) philosophy for psychology students. It introduces to the main questions and problems in metaphysics, epistemology, ethics, and political and social philosophy, and to the main attempts at answering those questions in an argumentative way. The course follows a historical line from the presocratics to 20th century philosophy.

The course aims at familiarizing the students with the questions as well as the results and methods of philosophy. This is attempted by selecting 'great thinkers', and presenting -per case- their main problems and answers in an argumentative context. Alternative viewpoints are mentioned and debated.

Initial competences

No specific prerequisites.

Final competences

- 1 To understand the specific nature of philosophical problems and types of analysis.
- 2 To be able to understand current philosophical thinking, based on a solid academically sound historical background.
- 3 To be able to critically define the most significant terms of philosophy.
- 4 To recognise the principal schools of thought and their proponents on an academic level.

5 Having an insight in and be able to critically think through the relations between knowledge, philosophy, science and society.
