Keywords

Classical developmental psychology, developmental stages, developmental theories, research methodology, physical development, cognitive development, emotional development, social development

Position of the course

This course provides a broad introduction to the domain of developmental psychology. Central to this course is a discussion of different views on human development, classical theories of developmental psychology and methodology specific to the domain of developmental psychology. Further, this course provides an age-bounded overview of developmental tasks and milestones encountered by people throughout the lifespan.

Contents

This course covers the following topics:

- General introduction to the domain of developmental psychology
- Lifespan perspective
- Classic and contemporaneous theories of developmental psychology
- Methodology of research in developmental psychology
- Features of normal development from infancy to late adulthood
- Physical development (e.g., motor skills and brain development)
- Cognitive development (e.g., information processing and moral development)
- Emotional development (e.g., recognition of emotions and emotion regulation)
- Social development (e.g., attachment and relations with peers)

Initial competences

Final competences

- 1 To understand and compare theories and their underlying anthropological assumptions
- 2 Ontwikkelingsvaardigheden en – fenomenen op een tijdslijn situeren in de menselijke levensloop

- 3 Verbanden zien tussen ontwikkelingsvaardigheden en –fenomenen in de verschillende levensperiodes
- 4 To relate, to situate, and to demonstrate implications of theoretical concepts.
- 5 To illustrate and translate theoretical concepts to daily life
- 6 To be acquainted with the recent developments in the domain
- 7 To understand the advantages and disadvantages of several methods in research on developmental psychology

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar, Lecture

Extra information on the teaching methods

- The lectures involve discussion and explanations of (developmental) theory. A number of small assignments and exercises are held during the lectures.
- As for the seminars, students can choose between one of (at least) three developmental themes (e.g., attachment, self-esteem, or ego-integrity) that are discussed in the lectures and that are studied more thoroughly during the sessions. Students receive exercises that are solved in an interactive fashion with the research assistant. Most importantly, students are taught to correctly interpret case materials provided by us against the background of developmental theorizing about the specific theme.
- Attendance at the lectures is optional yet recommended (to better understand the content of the course). Similarly, attendance at the seminars is highly recommended, yet not mandatory.

Study material

Type: Syllabus

Name: Ontwikkelingspsychologie

Indicative price: € 20

Optional: no

Language : Dutch

Number of Pages : 400

Available on Ufora : Yes

Online Available : Yes

Available in the Library : No

Available through Student Association : Yes

Additional information: Syllabus consisting of slides. It can be purchased in print, but it will also be available online through Ufora.

Course content-related study coaching

- Interactive support using Ufora.
- By appointment.

Assessment moments

end-of-term assessment

Examination methods in case of periodic assessment during the first examination period

Written assessment with multiple-choice questions

Examination methods in case of periodic assessment during the second examination period

Written assessment with multiple-choice questions

Examination methods in case of permanent assessment

Possibilities of retake in case of permanent assessment

not applicable

Extra information on the examination methods

Details on periodic evaluation: the written assessment has 45 to 50 multiple choice questions. Each question has 4 alternative responses, only one of which is correct. Most questions (40-45) deal with the content of the lectures (which is the same for all students) and a smaller set of questions (5-10) deals with the content of the practical sessions (which depends on the theme chosen by the student).

Calculation of the examination mark

The score for this course is based 100% on the periodic evaluation.
