Personality in daily life
Personality pathology

Position of the course

This course is situated within the Bachelor program (2nd year) Psychology.

Contents

This course addresses the following topics:

- contemporary theories/models of personality
- assessment of personality
- biological and behavioral-genetic perspective on personality
- Stability and change of temperament and personality across the life span (infancy, childhood, adolescence, early-mid-late adulthood)
- personality disorders: content, assessment, and development across the life course
- personality from a forensic perspective
- personality and functional domains of living:
 - school experience, career choice, dark professional functioning, life-long learning
 - romantic relations, family life, and parenting
 - peer-relationships
 - quality of life, health and longevity
 - life-events and coping

Initial competences

This course builds on certain course competences of Differential Psychology.

Final competences

- 1 To explain and apply different perspectives on personality and (abnormal) personality development
- 2 To be aware of strengths and weaknesses of different methods of personality assessment
- 3 To discuss personality pathology from a categorical versus a dimensional framework
- 4 To evaluate the relevance of scientific studies. To interpret research results in view of the research hypothesis
- 5 To indicate how (maladaptive) personality traits are significant in daily life across different contexts. To understand the relative significance of personality in human functioning against the background of other psychological factors
- 6 To explain the relevance of personality information for understanding maladaptive behavior. To use and apply personality information in the course of profiling of socially-deviant behavior

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar, Lecture, Independent work

Extra information on the teaching methods

Lectures with demonstrations and assisted self-tuition; Students have to study chapters and a set of scientific papers themselves, and contact the instructor in case of problems

Seminar in which students actively process information on personality relying on a self-assessment, in order to learn to apply and integrate theoretical learning content on the description and measurement of personality
