Keywords

Psychology, adolescence, development, school

Position of the course

This course adds to the realization of the basic competencies for teachers as described in the program of teacher education and on <https://www.ugent.be/nl/opleidingen/educatievemaester>.

Contents

After first defining adolescence as a period of life, the psychological consequences of the major changes in the biological, social and cognitive realms that take place during adolescence (12-22 years) are described. As a result of these changes, young people discover new possibilities in several important domains of development. The main trends in development are described in detail for three of these domains (sexuality, identity and moral development). In separate chapters the psychosocial development of adolescents will be examined, including changing relationships with parents and peers. Next, problems that teachers might be confronted with are discussed, including both internalizing problems and externalizing problems (drug use and delinquency). Finally, themes that relate to various aspects of adolescents' life world and youth cultures are discussed.

Initial competences

The general academic starting competencies that can be expected from an academic bachelor and master

Final competences

- 1 To be able to define adolescence as a specific life stage at the biological, cognitive and social level
- 2 To have insight in the most important developments regarding biological development, sexuality, cognition, identity, autonomy, and emotional and moral development during adolescence.
- 3 To develop a positive vision on adolescents and be able to defend it.
- 4 To have insight in changes in the relationships with parents and peers during adolescence, and the interaction between these two contexts.
- 5 To have insight in problem behavior during adolescence, to the extent a teacher is confronted with
- 6 To have knowledge about 1st line counseling and help for young people.
- 7 To understand the consequences of these developmental changes for young people's behavior and functioning at school.
- 8 As a teacher to stand in class with enough knowledge about young people, in order to become an intentional teacher, taking into account their developmental level and needs.

Teaching methods

Lecture, Independent work

Extra information on the teaching methods

Students in the normal learning-trajectory follow this course in lectures and through independent work of a number of texts.

For one topic, identity development, no lecture is provided. Instead, students will be offered an online learning path followed by an on campus workshop.

The **student-teachers - teachers in training - in a LIO-trajectory** have to realize the above-mentioned goals and competences through an alternative portfolio-trajectory. The assignments are elaborated in a manual. There are a number of contact-moments, intervision and coaching. A full LIO-trajectory includes a teaching assignment of minimal 500 hours (this corresponds with teaching assignment of 12 hours a week). Students with an assignment between 200 and 500 hours participate in the LIO-trajectory on a part-time basis. A candidate with a LIO-trajectory of less than 200 hours (this corresponds to a teaching assignment of less than 5h per week) is not admitted to the portfolio-trajectory. The student then has to follow the normal learning-trajectory.

This course is open for **incoming Erasmus students**. They study the course topics by means of self-tuition and three individual or small-group seminars, based on a selection of chapters from Feldman R. S. (2008). *Adolescence*. Upper Saddle River, NJ: Pearson Education. Exam takes place at the end of each semester, and consists of 40 multiple choice questions.

Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods

Only end-of-term evaluation (exam with MC questions) for students in the normal learning-trajectory. Students get clear exam instructions and tips during the lectures. On Ufora a list of sample questions is available as a self-test, with feedback on the answers.

The **student-teachers** (teachers in training) in a LIO-trajectory are evaluated on a permanent basis. These student-teachers (teachers in training) in a LIO-trajectory are evaluated on the basis of their assignments.

Calculation of the examination mark

Students who eschew one or more parts of the evaluation can no longer pass the course. Final scores will be reduced to the highest non-deliberative quotation (7/20) in case the final score is higher.
