### Teaching languages

French

### Keywords

educational settings, pre-service training, practice

### Position of the course

This course unit contributes to the realisation of the basic competences for teachers and the educational competences of the educational master's programme at UGent, as included in the programme description and concretised in the competence matrix, to be consulted on [www.ugent.be/educativemaster](http://www.ugent.be/educativemaster).

The internship is in line with the subject matter and the related teaching competence. The learning content of the internship is in line with the professional development of the students in the master program. There is a gradual build up from observing to independently realizing and supervising educational activities, from (relatively) simple to more complex educational situations. Reflection on one's own actions is central to the internship concept.

Over the entire internship, each student must complete at least 40 hours of work placement aimed at independently designing and supervising learning processes for a group of learners:

A minimum of 30h is done in a formal educational setting with a maximum of 8h of parallel classes.

- At least 10 hours of internship is taken in the relevant subject area for each subject didactic course taken.
- At least 12 hours of the total internship is completed in the 2nd and/or 3rd grade of secondary education. Only in certain justified cases where no or limited competencies are linked to the

subject didactics in secondary education, will deviations from this principle be allowed.

- Students who acquire the required competence in more than one form of education are expected to teach in 2 forms of education of the secondary level whereby a proportional distribution over the 2 is aimed for.

Depending on the specifics of the degree program, there is the possibility of an internship not only in secondary education, but also in an educational or professional Bachelor's programme, DKO (Deeltijds Kunstonderwijs), adult education, basic education, HBO5 and Se-n-Se.

- A maximum of 10 hours of the total internship, depending on the major, can be done in a broader educational setting (company training courses, youth work, museums, socio-cultural training work, educational internship abroad, etc) linked to the student's own professional expertise.

When determining the specific internships, attention is paid to the diversity of the internship setting in order to acquire the necessary competences to adequately respond to the challenges of metropolitan contexts, multilingualism and the implementation of the so-called M-decreet.

Each didactic subject may, in addition to the above minimum expectations, impose additional requirements on the interpretation/distribution of the internship hours. The content of the internship may also differ depending on the number of internship subjects that a student takes up in relation to a discipline.

## Contents

This part of the internship is linked to the subject didactics and the teaching competence linked to it and comprises 1/4 of the obligatory 12 credits in the programme line internship.

**Specifically, internship B consists of 4h of observation, 10h of independently designing and supervising of learning processes for a group of learners and participation in 2 so-called meso activities.**

Students who take up an interim assignment during the academic year can get an internship reduction if the following conditions are met:

- it concerns a teaching assignment in the 2nd - 3rd grade of secondary education;
- reduction is only granted on the basis of teaching hours in a subject for which the candidate has acquired the required skills within the framework of the teaching methods followed and the internship linked to it;
- a (preferably professional) colleague within the school acts as mentor who attends and evaluates at least 2 lessons (at the start and at the end of the assignment).
- Internship reduction is granted in proportion to the size, duration and content of the teaching assignment according to a fixed schedule in the internship manual.

Students who take up this internship in the framework of an Educational Master's programme in languages following a bachelor's programme, plan the integral internship in one phase: the shadowing internship. In this internship you follow your (subject mentor during two consecutive weeks at at least 16 teaching hours per week and with the other tasks the subject mentor performs. In this period you plan your four observation lessons, your ten active lessons and your two meso-activities. You also finish your reflection assignments.

In case of unforeseen circumstances an alternative scenario is agreed upon with the teaching team.

Students taking this internship in the framework of an abbreviated Educational Master programme in languages, plan the internship in consultation with the teaching team.

Please note: students can only start this work placement after they have completed the active lessons in the framework of their A internship for this language.

In addition to the above minimum expectations, each subject didactics can impose additional requirements on the interpretation/distribution of the internship hours. The interpretation of the internship can also differ depending on the number of internship subjects that a student takes in line with a subject didactics.

## Initial competences

You can download the list of prerequisites on <https://oasis.ugent.be/oasis-web/curriculum/voorkennisvancursus?cursuscode=H002251&taal=en>.

This course unit can only be taken up in the curriculum if a credit has been obtained

beforehand for the corresponding subject didactics or if this subject didactics is taken simultaneously.

### Final competences

- 1 Independently designing a teaching-learning environment;
  - 2 Realising real educational contexts in accordance with the vision, knowledge and skills developed in the other course units of the educational master's programme
  - 3 Adapting learning objectives, teaching methods and assessment methods to the initial situation of the target audience
  - 4 Being able to reflect critically on one's own actions and learning process during and after the internship, either individually or in a group
  - 5 Being able to report in a structured way on the work done and the underlying decision process
  - 6 Communicating adequately and clearly with pupils/students, colleagues and parents and being able to adopt a professional and deontological attitude
  - 7 Correct and adequate use of the Dutch language
  - 8 The student can deal appropriately with students with health problems
  - 9 Being able to deal with feedback in a constructive way
  - 10 Demonstrating appropriate attitudes
  - 11 Knowing the range of tasks of a teacher within an educational context
- Conditions for credit contract

### Conditions for credit contract

This course unit cannot be taken via a credit contract

### Conditions for exam contract

This course unit cannot be taken via an exam contract

### Teaching methods

Integration seminar, work placement

### Extra information on the teaching methods

The return sessions are realised through integration seminars. These are intervision moments during which students exchange internship experiences.

For the student teachers in an LIO job (= inservice internship) the objectives and competences are realised via an alternative portfolio path. The assignments are elaborated in a manual. A number of contact moments, a number of obligatory lessons and/or seminars and moments of guidance are provided. In addition, LIO students and students with an internship reduction at LIO level are obliged to participate in 3 cross-curricular intervisions.

A candidate with a LIO job of **less than 200 hours** (this corresponds to a teaching assignment of less than 5 hours per week) is not admitted to the portfolio route, but may be eligible for a limited internship reduction on an individual basis.

### Learning materials and price

There are supporting documents for the different internship activities. These documents are available on the Ufora electronic learning environment.

### References

### Course content-related study coaching

Supervision of the internship at school is done by the mentor and subject teacher (= the subject mentor) where the student teaches. The guidance relates to the preparation and the realisation of the lesson. This is the work supervision. The mentor and the subject mentor evaluate the internship according to predetermined criteria laid down in a lesson evaluation document. The mentor's guidance and evaluation of the student is laid down in an agreement in which the rights and obligations of the student towards the internship school are formulated. The mentor's guidance also concerns the familiarisation with the school and the realisation of the meso-activities. The internship supervisor (associated with the training, in this case the practice assistant and/or educational supervisor) is responsible for the contacts with the schools, the individual supervision, feedback and guidance (if possible during a visit to the internship school), the coordination, follow-up and guidance of the internship trajectory.

## **Evaluation methods**

continuous assessment

## **Examination methods in case of periodic evaluation during the first examination period**

## **Examination methods in case of periodic evaluation during the second examination period**

## **Examination methods in case of permanent evaluation**

Portfolio, participation, job performance assessment

## **Possibilities of retake in case of permanent evaluation**

examination during the second examination period is possible in modified form

## **Extra information on the examination methods**

The students create a portfolio containing observations, lesson preparations, learning materials, tests, etc.; evaluations by the mentor, the subject mentor and the internship supervisor; their own reflection reports; the interim learning objectives formulated by the student; a synthesis report with an assessment of their own learning progress. A concluding discussion on this takes place within the programme with the responsible teacher and/or internship supervisor.

For the student teachers in an LIO job, continuous evaluation is provided through the alternative assignment they work out in the portfolio trajectory.

## **Calculation of the examination mark**

The student is assessed on the whole of the evaluations at the various internships, including the basic competences for teachers and the components language and attitudes. This gives a total score of 100 points.

-75% of the marks relate to the actual teaching in the process the student goes through as a teacher. The final score for the lesson realization component explicitly remains a score that reflects the achieved end point and result of a process.

-25% of the points relates to the quality of the internship portfolio and the participation in the intervision sessions.

Within both components, each subject pedagogy can put forward sub-competencies specific to its own field that are essential to succeed. The responsible lecturer remains ultimately responsible for determining the final mark, whereby the final score is not an arithmetic mean of the partial scores if the sum of the components does not sufficiently reflect the achieved end point in the internship process.

Internship lessons for which the time and location are not communicated to the subject didactics in time do not apply. LIO students also register for the first lesson.

The student who withdraws from (part of) the periodical and/or non-periodical evaluations will receive a final grade that cannot be deliberated

Students must be registered for the role for the educational master's program by 15 October at the latest. Since attendance in the exercises is mandatory, the student must be present from the first lesson of the corresponding course didactics.

## **Facilities for Working Students**

Working students contact the teaching team to discuss the specific situation.
