Keywords

Teaching Spanish as a foreign language, overview of didactic developments.

Position of the course

This course unit contributes to the realisation of the basic competences for teachers and the educational competences in preparation for the educational Master's programme at UGent, as included in the programme description and concretised in the competence matrix, to be consulted on www.ugent.be/educatievemaster.

Contents

We will deal with 3 topics:

1. Research skills: this is done on the basis of a general module that is shared by other courses on language didactics.
2. Vocabulary: forms of teaching and practice, with specific attention to problems such as difficulty levels, register and geographical variation, idiomaticity and degree of specialisation.
3. Grammar: the main stumbling blocks of Spanish grammar, and how to approach them in didactic activities (por/para, ser/estar, indicativo/subjuntivo, tiempos del pasado).

Initial competences

Students are expected to have acquired sufficient domain-specific knowledge

before or while taking this course. The entry requirements for the subject-specific didactics are regulated. More information can be found on www.ugent.be/educatievemaester.

Erasmus students can only take this course if they have already taken Vakdidactiek A, or are following a pedagogical program.

Final competences

- 1 The students become familiar with new learning forms and media in order to transmit the teaching content to the students through authentic learning tasks.
- 2 Having a command of Spanish at C1 level for oral and written skills.
- 3 The students can prepare a well-structured lesson plan for specific purposes in Spanish
- 4 The students deepen their knowledge of the professional literature and can critically process the various theories on language acquisition and language didactics
- 5 The students can approach their teaching critically-reflectively from a variety of perspectives
