### Teaching languages

Dutch

### Keywords

didactics, pre-service training

### Position of the course

This course unit contributes to the realisation of the basic competences for teachers and the

educational competences of the educational master's programme UGent, as included in the course sheet and concretised in the competence matrix, to be consulted at <https://www.ugent.be/pp/n/Opleidingen/educatieve-master>

## Contents

The short extension internship is in line with the course didactics that students follow in parallel and the associated teaching qualifications. The learning content of the internship is in line with the subject content of the students in the master's programme. Because this is an extension internship, the concrete details (target group, educational setting, nature of the activities, etc.) are determined in consultation between the student and the teaching team. There are at least 8h of observation and 20h of independent design and supervision of learning processes in secondary education. For higher education, the specific content is individually agreed upon between the student and the didactic team. Internships outside of education can be credited according to the key 1 SP = load of 27h.

## Initial competences

## Course content-related study coaching

The supervision of the internship on the spot is done by the mentor(s) at the place where the educational activity takes place. The supervision relates to the preparation and realisation of the activity. The mentor(s) assess(es) the internship according to predetermined criteria laid down in a lesson evaluation document. The guidance and evaluation of the student by the mentors is laid down in an agreement, in which the rights and obligations of the student towards the internship are formulated. The guidance of the mentor(s) also concerns the ingrowth in the internship. The internship mentor (linked to the program, in this case the educational didactician and/or educational supervisor) is responsible for the contact with the internship, the individual supervision, feedback and guidance (if possible during a visit to the internship), the coordination, follow-up and guidance during the internship.

Assignment, skills test

**Possibilities of retake in case of permanent assessment**

examination during the second examination period is possible

**Extra information on the examination methods**

The students create a portfolio including observations; lesson preparations, learning materials, tests, etc.; evaluations by the mentor(s) and the internship supervisor; the student's own reflection reports; the interim learning objectives formulated by the student; a synthesis report with an assessment of the student's own learning progress. There is a final discussion about this within the program with the responsible tutor and/or internship supervisor. For the student-teachers in an LLO job, permanent evaluation is provided via the alternative assignment which they elaborate in the portfolio trajectory.

**Calculation of the examination mark**

The student is assessed on the whole of the evaluations on the different internships, including the basic competences for teachers and the components language and attitudes. This gives a total score on 100 points. Students must be enrolled in the role for the educational master's programme by 15 October at the latest. As presence in the exercises is mandatory, the student must be present in the first lesson of the corresponding subject didactics. Internship lessons for which the time and location are not communicated to the course didactics in time do not apply. LLO students also register for the first lesson. The student who withdraws from period-related and/or non-period-related evaluations receives a final grade that cannot be decided upon.

**Facilities for Working Students**

Work students contact the teaching team to discuss the specific situation.
