Teaching languages

Dutch

Keywords

CLIL, CLIL didactics, language developmental teaching

Position of the course

This course unit is subsequent to H002246 – Theory and Practice of Content and Language Integrated Learning. The course unit builds on and makes use of the basic principals and methods of the CLIL didactics in a language-specific manner. Lessons also briefly address multilingualism in education.

This course is focused on developing the language proficiency of future Dutch-medium CLIL teachers. As such, prospective students are non-native speakers of Dutch who have an excellent command of Dutch (CEFR: C1).

This course unit contributes to the realisation of the basic CLIL-teaching competencies and the study programme competencies of Ghent University's Master of Science in Teaching, as set out in the study programme sheet and the competency matrix.

Contents

This course unit familiarizes students with the language-specific (i.e. Dutch) uses of the CLIL-methods. To do so, students are introduced to the framework 'The Language Triptych' by Coyle, Hood & Marsh (2013), in which three components of language are explored.

- Language of learning (content-obligatory): specific terminology/jargon, i.e. the language needed to explore, process, elaborate on and apply new learning contents
- Language for learning (content-compatible): interactive teaching methods, support, multimedia, ... i.e. the language needed to execute and facilitate tasks within an educational setting.
- Language through learning: tasks, assessment, feedback ... i.e. the new language that is developed/is taught through learning.

The focus of attention lies with the education-related language of instruction and jargon. This framework focusses on using activating teaching methods in the CLIL/target language, language developmental teaching, language-based education, ICT integration, cooperative learning and classroom differentiation within the target language.

The following topics are introduced:

- General classroom language
 - concerning classroom organisation
 - concerning formulating and giving simple instructions (language of instruction) concerning classroom organisation
 - concerning the sequencing of the lesson (structure)
 - concerning the general class structure & class management
- Socio-cultural language
- Affective language (the teacher can correctly express affection, interest, etc.

in the target language within the class context)

Pragmatic formulations linked to the general class context

- General teaching methods within CLIL

Using and supporting different instruction methods within the target language

Using and supporting different interaction methods within the target language

Using and supporting different task methods within the target language

Using and supporting different cooperation methods within the target language

Using and supporting different forms of games within the target language

- Course-specific and course-compatible language

Using language of instruction while teaching

Using metalanguage, that supports metacognition, while teaching

Using references within the target language

Using 'scaffolding' within the target language

Using learning strategies within the target language

During the contact moments, the above topics are linked to theory and practice via good practices. Oral and written language skills are explicitly practised and linked to the CLIL didactics via microteaching. Students work on their general language skills, and the language of instruction at C1 level of the Common European Framework of Reference for Languages (CEFR (in Dutch):

<http://taalunieversum.org/inhoud/erk-nederlands/over-het-erk>) for all the necessary skills (speaking, writing, listening, reading).

Within this course unit, students get the opportunity to put their acquired insights into practice via microteaching and an internship (3h). Microteaching offers students the opportunity to prepare, present, comment on and assess CLIL-teaching moments. In preparation of the internship, students should be able to implement the CLIL-didactics and the necessary language requirements, as well as develop, correctly use, support and intervene in the CLIL-material if required.

Initial competences

You can download the list of prerequisites on [oasis.ugent.be?cursuscode=H002344&taal=en](https://www.oasis.ugent.be/?cursuscode=H002344&taal=en).

This course unit uses a binding admission test to determine the student's level. The test consists of a written and oral part. The student needs to pass this test, i.e. the student is required to show that he/she has reached the B2 level for Dutch (see CEFR). Students are prepared for this test in the course unit H002246 – Theory and Practice of Content and Language Integrated Learning, which uses an orientating admission test and a remedial trajectory if required.

Students should be aware that they cannot take up this course unit if they fail the admission test, and that they will need to change their curriculum.

Final competences

The course unit has the following objectives.

- Using and appropriately applying *general classroom language* within the classroom, with special attention to diversity and multilingualism in the learner groups, and the starting situation
- Correctly using general teaching methods within the CLIL-lesson, and taking into account the starting situation
- Correctly applying and using course-specific and course-compatible language, and taking into account the starting situation
- Using learning strategies within the target language
- Guiding the learning and developmental process in correct Dutch (CEFR-C1)
- Having a command of Dutch at C1 level of the Common European Framework of Reference for Languages for the four language skills (speaking, writing, listening, reading)
- Reflecting on the experience from a theoretical and empirical perspective

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Group work, Seminar

Extra information on the teaching methods

Some content is taught via blended learning.

The internship comprises 3 lesson hours in secondary education.

This course assumes the responsible use of generative artificial intelligence (GAI).

During the lessons, what this means will be explained.

Study material

Type: Handouts

Name: Handouts, slides and papers available via ufora

Indicative price: Free or paid by faculty

Optional: no

Language : Dutch

Available on Ufora : Yes

Online Available : Yes

Available in the Library : No

Available through Student Association : No

Usability and Lifetime within the Course Unit : regularly

Course content-related study coaching

Study coaching is conducted by the teaching assistants.

- Interactive support via Ufora.
- By appointment.

Assessment moments

end-of-term and continuous assessment

Examination methods in case of periodic assessment during the first examination period

Written assessment with open-ended questions, Written assessment, Assignment

Examination methods in case of periodic assessment during the second examination period

Written assessment with open-ended questions, Written assessment, Assignment

Examination methods in case of permanent assessment

Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods

End-of-term assessment (30%):

Written exam: Language test (students need to demonstrate their command of the language at C1 level)

Oral exam: Conversation based on a listening exercise (students need to demonstrate their command of the language at C1 level)

Continuous assessment (70%):

Portfolio with (1) CLIL-teaching material for the microteaching, (2) CLIL-teaching material for the 3 hours of internship and (3) reflection-log book about the microteaching and internship.

Calculation of the examination mark

Failure to participate in the evaluation of one or more course units may result in a fail for the entire course unit and the final grade will be reduced to the highest non-delinquent grade (7/20) if the final grade is higher.

The final grade is the weighted average of the different course units. Students can only pass this course unit when they obtain at least 10/20 for all components.

If students obtain less than 10/20 for at least one of the course units, the following rules apply:

- Obtaining a score of 8/20 or 9/20 for at least one part of the evaluation, results in an overall insufficient mark. If the final score would still be a 10 or more out of 20, this is reduced to the highest non-passing grade, i.e. 9/20.
- Obtaining less than 8/20 for at least one part of the evaluation results in an overall insufficient mark. If the final score would still be a mark of 8 or more on 20, this is reduced to the highest non-failure mark, i.e. 7/20.

Facilities for Working Students

Students with working student status can discuss the facilities in dialogue with the lecturer-in-charge.
