### Teaching languages

Dutch

### Keywords

Dutch L2-landscape and target groups, adult education, teaching methods

### Position of the course

This course unit contributes to the realisation of the basic teaching competencies and the study programme competencies of Ghent University's Master of Science in Teaching, as set out in the study programme sheet and the competency matrix, which can be consulted on [www.ugent.be/educatievmaster](http://www.ugent.be/educatievmaster)

### Contents

The course consists of two core modules (Foundation and Expansion) and a series of in-depth lessons which may change in content across academic years (In-depth study). The 'Foundation' and 'Expansion' modules include a microteaching component. In addition, students attend three general sessions on language didactics in the first semester.

The following topics are covered in this course:

**Foundation:** e.g. the organisation of Dutch L2 education in Flanders, written and oral skills

**Expansion:** e.g. feedback, effective L2 teaching methods, motivation.

**In-depth study:**

- Testing and Assessment
  - Session 1: Principles of testing and assessment
  - Session 2: Assessing receptive skills in NNT learners
  - Session 3: Assessing productive skills in NNT learners
- Other possible themes include L2 acquisition and trauma, Dutch L2 language policy... These themes may vary from year to year.

These in-depth classes are freely accessible to all Eduma students (Session 1) and Dutch L2 teachers (all sessions).

**General sessions on language didactics:**

Students attend three lectures focusing on theoretical concepts and language teaching frameworks. These frameworks are then applied in the subject-specific teaching modules within the discipline. In the case of a split programme (e.g. the Eduma integrated pathway), students attend the three sessions in the first year.

**Mandatory attendance**

Attendance in class is mandatory. Students enrolled in the regular programme from the 2026-27 academic year onwards must attend all lessons (foundation, expansion, in-depth study, and general sessions on language didactics).

Activities related to the internship or Master's theses do not constitute a valid reason for absence from class and must be scheduled at another time.

As attendance is compulsory, this module cannot be included in the curriculum from week 3 onwards.

Since class attendance is mandatory, this course cannot be added to the curriculum after the third week of classes.

**Initial competences**

Students are expected to have sufficient discipline-specific knowledge before starting the course unit. The access requirements for the teaching methodologies are regulated. More information can be consulted via

[www.ugent.be/educatievemaester](http://www.ugent.be/educatievemaester).

Students are expected to have a high proficiency in Dutch (level C1 in the CEFR).

Exceptions for exchange students who wish to teach Dutch in a non-native environment (Dutch as a Foreign Language) need to be discussed individually with the teachers.

**Final competences**

- 1 Students can describe the organization of second language (NT2) education in Flanders.
- 2 Students can identify the characteristics and needs of different NT2 target groups and apply them in a didactic context.
- 3 Students can formulate learning objectives for NT2 learners and link them to proficiency scales and the CEFR.
- 4 Students can apply didactic principles and instructional methods in the teaching of productive and receptive language skills.
- 5 Students can analyze, adapt, and develop NT2 teaching materials with attention to the specific needs of different NT2 target groups.
- 6 Students can identify effective didactic strategies and apply them purposefully in diverse NT2 contexts (such as Ligo, OKAN, CVO, UTC).
- 7 Students can weigh explicit and implicit instructional methods and apply them purposefully in NT2 lessons.
- 8 Students can apply motivating and autonomy-supportive didactic principles in NT2 lessons.
- 9 Students can apply principles of testing and assessment within NT2 education.
- 10 Students can validly and reliably assess receptive and productive language skills in NT2 learners.
- 11 Students can analyze different forms of feedback and apply them purposefully to speaking and writing skills in NT2 lessons.
- 12 Students can evaluate and optimize the impact of feedback strategies for different NT2 target groups.
- 13 Students have an understanding of the theoretical aspects of language acquisition and language teaching, and apply this understanding in their

teaching practice.

### Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

### Conditions for exam contract

This course unit cannot be taken via an exam contract

### Teaching methods

Group work, Seminar, Lecture, Independent work, Peer teaching

### Extra information on the teaching methods

The 'Foundation', 'Expansion' and 'In-depth study' modules consist of a combination of lectures and seminars. For the general sessions on language didactics, students attend three theoretical lectures in Semester 1. Students deliver two micro-lessons (one within the 'Foundation' module and one within the 'Expansion' module).

No lesson recordings are made for this module.

This course assumes the responsible use of generative artificial intelligence (GAI).

During the lessons, what this means will be explained.

The LIO guidelines can be found in the LIO manual.

### Study material

Type: Handbook

Name: Handboek Nederlands als tweede taal in het volwassenenonderwijs

Indicative price: € 58

Optional: no

Language : Dutch

Author : Folkert Kuiken & Sible Andringa

ISBN : 978-9-04690-835-8

Number of Pages : 480

Online Available : No

Available in the Library : No

Available through Student Association : Yes

Usability and Lifetime within the Course Unit : intensive

Usability and Lifetime within the Study Programme : intensive

Usability and Lifetime after the Study Programme : occasionally

Additional information: This handbook is also used in 'Vakdidactiek B: Nederlands niet-thuistaal'.

### **Course content-related study coaching**

If students have questions about the course content, they can contact the lecturers or make use of the study support services offered by the faculty.

### **Assessment moments**

end-of-term and continuous assessment

### **Examination methods in case of periodic assessment during the first examination period**

Oral assessment

### **Examination methods in case of periodic assessment during the second examination period**

Oral assessment

### **Examination methods in case of permanent assessment**

Participation

### **Possibilities of retake in case of permanent assessment**

examination during the second examination period is possible

### **Extra information on the examination methods**

- Extra information end-of-term assessment: oral exam (70%)
- Extra information continuous assessment: Each component is concluded with a microteaching session. Only the microteaching session of Component 2 (Expansion) is included in the final evaluation (30%).
- Description second exam opportunities: second exam opportunities are possible, for both the end-of-term and the continuous assessments.
- Feedback can be obtained by appointment.

### **Calculation of the examination mark**

The end-of-term evaluation accounts for 70% of the final grade, and the continuous assessment (microteaching) accounts for the remaining 30%. Students must pass both the end-of-term and the continuous assessment components in order to pass the course as a whole.

If a student fails to participate in one or more parts of the evaluation, they can no longer pass the course. If the final score would otherwise be 10 out of 20 or higher, it will be reduced to the highest non-compensable grade (maximum 9/20). Partial results for which the student has obtained at least half of the points can be carried over to the next examination period within the same academic year. Partial results are never rounded.

### **Facilities for Working Students**

Students with working student status can discuss the facilities in dialogue with the lecturer-in-charge.
