GHENT UNIVERSITY

Course Specifications

Valid as from the academic year 2015-2016

Physiology of Aquatic Organisms (I001579)

Due to Covid 19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Course size *(nominal values; actual values may depend on programme)*

Credits 3.0	**Study time** 75 h	**Contact hrs**	30.0 h

Course offerings and teaching methods in academic year 2022-2023

A (semester 2)	English	Gent	practicum	15.0 h
			lecture	15.0 h

Lecturers in academic year 2022-2023

De Boeck, Gudrun	LA22	lecturer-in-charge

Offered in the following programmes in 2022-2023	**crdts**	**offering**
Master of Science in Aquaculture	3	A
Exchange Programme in Bioscience Engineering: Agricultural Sciences (master's level)	3	A

Teaching languages

English

Keywords

Physiology, aquatic organisms, fish.

Position of the course

Animal physiology can be defined as the study of the function of animals and their constituent parts. The ultimate goal of this subject is to understand the mechanisms that operate in living organisms at all levels, ranging from cell to the whole organism. This goal is a very ambitious one, for each living organism, a single cell, is incredibly complex.

Contents

1. Introduction: Central themes in animal physiology
2. Energetics of living cells
3. Membranes, channels, transport
4. Ionic and osmotic balance
5. Gas exchange and acid base balance
6. Hormonal control
7. Energy metabolism, size and temperature

Initial competences

General biology, chemistry and biochemistry.

Final competences

1 The student understands the structure and function of biomembranes.
2 The student ynderstands the ionic and osmotic balances and gas exchanges.
3 The student understands the acquisition and use of energy.
4 The student is able to apply good laboratory practices.
5 The student is able to perform measurements on energy use (respiration rates, energy stores).

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Lecture, practicum

Extra information on the teaching methods

Course content-related study coaching

Study guidance upon request by email or on appointment.

Evaluation methods

end-of-term evaluation and continuous assessment

Examination methods in case of periodic evaluation during the first examination period

Written examination, oral examination

Examination methods in case of periodic evaluation during the second examination period

Written examination, oral examination

Examination methods in case of permanent evaluation

Participation

Possibilities of retake in case of permanent evaluation

examination during the second examination period is not possible

Extra information on the examination methods

Calculation of the examination mark

Out of 20:
20 point attributed to the oral exam with written preparation

Students that do not attend practical classes without a valid reason, should retake the course the next academic year.

Students who eschew period aligned and/or non-period aligned evaluations for this course unit may be failed by the examiner.
