English

**Keywords**

**Position of the course**

**Contents**

The student shall during 5 weeks (minimum) participate in a full-time internship (or part-time equivalent to 5 weeks full-time), with an appointed supervisor within the host organization. The work/tasks during the internship must be clearly related to SINREM, and train the student in independent work and cooperation with others. Innovation and entrepreneurship in raw material and resource science are of major interest.

The student will be engaged in every-day working activities at a level corresponding to the final degree. During the training the student has to report to a mentor which is a teacher of the courses of the program. Upon completion of the internship, the student will also write a report. In the report students will pay attention not only to the practical work they performed but also to methodology, results, managerial, economical and strategic aspects of the internship and workplace.

Course introduction takes place at the university, while supervision is undertaken at the internship location.

**Initial competences**

**Final competences**

- 1 reflect critically on the experience gained.
- 2 integrate and participate in the day-to-day-activities of the workplace.
- 3 give a scientific account of the experience gained in the form of a scientific report.
- 4 analyse the workplace and the activities it undertakes within it's economical, managerial or strategic context.
