Seminars, company visits

Position of the course

This is a course consisting of seminars given by different experts on aspects of marine micro-ecology, biotechnology, dredging, building with nature, maritime constructions, maritime energy production, etc... The specific topics vary yearly and are tailored to the interest of the student. Some aspects will be illustrated through site visits. The course also includes participation in the VLIZ Marine Science Day.

Contents

The seminars will be organised specific for this programme. The topics may change from year to year. All information concerning the principles, organisation, contact persons and subjects of the seminars and company visits will be announced by the responsible lecture.

Initial competences

Basic knowledge given during the 1st master

Final competences

- 1 Knowledge on current aspects of marine biotechnology, dredging, building with nature, maritime constructions, maritime energy production
- 2 Practical insights into the recent developments in the sustainable use of marine systems
- 3 Multi-disciplinary approach to multi-use applications at sea
