Course size *(nominal values; actual values may depend on programme)*

Credits 5.0 **Study time** 150 h **Contact hrs** 45.0h

Course offerings in academic year 2022-2023

A (Year) English Gent

Lecturers in academic year 2022-2023

Stephan, Johannes FREIBE01 lecturer-in-charge

Offered in the following programmes in 2022-2023

	crdts	offering
International Master of Science in Sustainable and Innovative Natural Resource Management	5	A

Teaching languages

English

Keywords

Position of the course

Contents

The students will prepare a written thesis. It will be compilation of self-researched literature on a given specific scientific or technical question and should include possible business models to generate systems, products, services or processes. The results from the thesis will be presented in a seminar lecture and discussed afterwards. The students should attend most of the other presentations and participate actively in the corresponding discussions

Initial competences

Final competences

- 1 Consult specialist literature and interpret it critically according to scientific standards.
- 2 Plan, monitor and steer scientific research.
- 3 Collect, process, critically analyse and interpret data.
- 4 Identify new and remaining bottlenecks and research questions based on knowledge, insights and experience.
- 5 Deploy own knowledge in a creative, purposeful and innovative way in research, design and production processes.
- 6 Argue in a scientifically correct way in a multidisciplinary context.
- 7 Exhibit openness to innovative scientific developments and their applications in a broad scientific, economic and social context.
- 8 Adopt an active attitude towards permanent knowledge development, lifelong learning and steer the own learning process independently.
- 9 Clearly communicate research results in English.
- 10 Conceptualize, plan and execute independently result-oriented new concepts at the level of a starting professional.
- 11 Understand the complexity of a problem/system using quantitative methods.
