A

### Teaching languages

English

### Keywords

Immunobiology, innate and adaptive immunity, humoral and cellular immunity, inflammation, infectious diseases

### Position of the course

This course aims at providing a detailed overview of immunology of fish and shellfish.

### Contents

- 1 History of immunology
- 2 Antigens
- 3 Immune organs of fish
- 4 Inflammation
- 5 Innate immunity
- 6 Key cells
- 7 Cell based innate immune sensing fish
- 8 Cellular effectors in fish
- 9 Humoral-based immune sensing in fish
- 10 Cytokines and chemokines
- 11 MHC in fish
- 12 Ag presentation
- 13 T cell response in fish
- 14 Immunoglobulines of fish
- 15 B cell response in fish
- 16 Hemocytes in shellfish and tissues of their immune system
- 17 PRR of shellfish
- 18 ProPO in shellfish
- 19 Coagulation in shellfish
- 20 Anti-viral mechanisms in shellfish

### Initial competences

An adequate knowledge of basic concepts of general biology, cell biology, microbiology and aquaculture is crucial to be able to follow along and for the proper understanding of the lectures

### Final competences

- 1 The student possesses a broad knowledge at an advanced level in a number of basic disciplines (biology, immunology) relevant to aquaculture

- 2 The student understands the processes ongoing in different forms and systems of aquatic production in relation to disease prevention
- 3 The student understands the ethical issues of animal production and experimentation
- 4 The student can design and implement strategies for future development in aquaculture with emphasis on prevention of infectious diseases
- 5 The student is able to interact with peers, with various stakeholders in the aquaculture sector, and with a general public concerning personal research, thoughts, ideas, and research proposals, both written and orally

#### **Conditions for credit contract**

Access to this course unit via a credit contract is determined after successful competences assessment

#### **Conditions for exam contract**

This course unit cannot be taken via an exam contract

#### **Teaching methods**

Lecture

#### **Extra information on the teaching methods**

Theory lectures: lectures based on powerpoint presentations.

#### **Study material**

Type: Syllabus

Name: FISH AND SHELLFISH IMMUNOLOGY

Indicative price: € 15

Optional: no

Language : English

Number of Pages : 179

Available on Ufora : No

Online Available : No

Available in the Library : No

Available through Student Association : No

Additional information: Available for sale during the first lecture.

Type: Slides

Name: FISH AND SHELLFISH IMMUNOLOGY

Indicative price: Free or paid by faculty

Optional: no

Language : English

Number of Slides : 825

Available on Ufora : Yes

Online Available : No

Available in the Library : No

Available through Student Association : No

Additional information: Available on UFORA a few days before each lecture

#### **Course content-related study coaching**

Teacher available for student counselling

#### **Assessment moments**

end-of-term assessment

#### **Examination methods in case of periodic assessment during the first examination period**

Written assessment

**Examination methods in case of periodic assessment during the second examination period**

Written assessment

**Examination methods in case of permanent assessment**

**Possibilities of retake in case of permanent assessment**

not applicable

**Extra information on the examination methods**

Theory: written examination

**Calculation of the examination mark**

Out of 20:

20 points attributed to written exam

Students who eschew period aligned evaluations for this course unit may be failed by the examiner.
