

## Selective Separation of Strategic Elements (I002849)

**Course size** *(nominal values; actual values may depend on programme)*

**Credits** 5.0                      **Study time** 150 h

**Course offerings in academic year 2023-2024**

A (year)                      English                      Gent

**Lecturers in academic year 2023-2024**

Haseneder, Roland                      FREIBE01      lecturer-in-charge

**Offered in the following programmes in 2023-2024**

	<b>crdts</b>	<b>offering</b>
<a href="#">International Master of Science in Sustainable and Innovative Natural Resource Management</a>	5	A

**Teaching languages**

English

**Keywords**

**Position of the course**

**Contents**

- membranes, modules, hybrid processes
- driving forces, transport resistances
- structures, materials
- mass transfer
- module construction
- MF, UF, NF, RO
- standard applications
- scaling, fouling effects
- special applications: mine water treatment, leaching solutions, resource recovery
- internship to membrane processes

**Initial competences**

null

**Final competences**

On completion of the course the student shall be able to explain membrane technology and the different applications like extraction and membrane assisted processes regarding the separation of value products. Focus is put on strategic elements. They can use their physicochemical knowledge on membrane separation, development of hybrid operation systems and the influences for practical applications and are familiar with the methods and problems related to separation devices. Due to the seminar the students will be able to discuss the current literature on the topic.

**Conditions for credit contract**

This course unit cannot be taken via a credit contract

**Conditions for exam contract**

This course unit cannot be taken via an exam contract

**Teaching methods**

Lecture, practical

**Extra information on the teaching methods**

S1 (WS): Lectures (2 SWS)

S1 (WS): Seminar (1 SWS)

S1 (WS): Practical Application (1 SWS)

**Course content-related study coaching****Evaluation methods**

**Examination methods in case of periodic evaluation during the first examination period**

**Examination methods in case of periodic evaluation during the second examination period**

**Examination methods in case of permanent evaluation**

**Possibilities of retake in case of permanent evaluation**

examination during the second examination period is possible

**Extra information on the examination methods**

For the award of credit points it is necessary to pass the module exam.

**Calculation of the examination mark**
