

asymmetries. It does so by addressing unequal power relations in historical and contemporary processes of globalization, highlighting multiple scientific and societal perspectives, with special attention to perspectives from the global South. Interdisciplinarity and multiperspectivism are central to the course, addressing not only convergences and similarities, but also embracing difference and debating conflicting positions in the academic and societal debate on global challenges and global justice.

### **Begincompetenties**

### **Toelichtingen bij de didactische werkvormen**

Thematic modules with an introductory lecture, followed by group work: the aim is to set-up group discussions and portfolio-assignments around each of the respective modules. As such, we aim to stimulate the interdisciplinary perspective bottom-up: students engage in interaction around the global challenges from their own interdisciplinary background and aim to arrive at complementary understandings.

To achieve this aim, we will divide the group in smaller groups of max 10 students (dependent on the total number of students) and these groups will be (necessarily) interdisciplinary and (preferably) also internationally mixed.
